

# ANTI GRAFFITI COAT

EASY TO APPLY GRAFFITI PROTECTION

## Product Description:

**Coval Anti-Graffiti Coat** is a thin film, single component coating that creates a covalent and ionic bond with the substrate. The bond eliminates voids and forms an entirely new, clear surface which provides a superior non-sacrificial barrier of protection from graffiti. The new, clear surface allows easy cleaning of graffiti, paint, permanent marker, and stickers without affecting the surface underneath. No harsh chemicals are needed to remove the marks, simply use a mild cleaner.

## Product Features

- Long Lasting
- UV Resistant
- Reduces Maintenance Costs
- Easily Cleans
- No Harsh Chemicals

## Uses:

**Coval Anti Graffiti Coat** can be applied on painted or unpainted concrete, metal, signage, most plastics and vinyl surfaces. This protects against the damaging effects of paint, permanent marker, most acids, and stickers.

## Application:

**Coval Anti Graffiti Coat** can be sprayed rolled or brushed onto the surface. It's fast drying and requires only one thin coat!

- Under 100 VOCs
- Acid Resistant
- Non-Conductive
- UV Stable
- Thin & Lightweight
- Repels Water & Dirt
- Creates Non-Toxic New Surface

EASY TO APPLY GRAFFITI PROTECTION

## **Project Overview: San Francisco Bay Area Rapid Transportation (BART)**

Coval Anti-Graffiti Coat is currently used as a coating for the San Francisco Bay Area Rapid Transit (BART) since 2008 and will be applied to 19 new rail stations currently under construction. Anti-Graffiti Coat is applied over paint, on concrete walls, signs and many other surfaces. These areas are now easy to clean and graffiti-free

## **Project Overview: Sign Companies**

Companies spend millions of dollars a year on a variety of signs advertising their brand and events only to have them destroyed in second by vandals. Now you can protect your investment with **Coval Graffiti Coat!**
